

Central & West Elementary

# Meal Account Balances

Each child participating in the USD320 meal program must maintain a positive balance in his/her meal account. When a parent/sponsor registers a student, they enter into an agreement with USD320 Food Service to ensure that the account balance remains positive.

Payments brought to school will be deposited before and after the school lunch meal and will not be allowed during lunch service. If a student has reduced their account to a zero balance; the student will lose the privilege of using their account to purchase ala carte items until payment is made. **Please note: If your student brings a lunch from home and wishes to purchase a school milk, there must be a positive balance to cover the cost of the milk (35¢).**
