Laptop Handbook
2019-2020

The intent of a 1 to 1 laptop initiative is to provide a common device for all teachers and students to utilize for the enhancement of teaching and learning for the students of USD 320. By providing our high school students and middle school students laptops, they will have more opportunities to develop academic, problem solving, and higher order thinking skills than ever before. Learning opportunities across all curriculums will be enhanced as students are able to learn away from a typical classroom setting with the information pipeline at their fingertips. This also allows students and staff to have more flexibility and efficiency in scheduling courses. These policies and procedures include expectations, responsibilities and direction of student use of laptops as a tool to enhance teaching and learning.

Wamego Unified School District

Student Acceptable Use Policy

General Statement of Policy

Wamego Unified School District provides access to the district computer network and computing devices (district technology) for intranet resources, e-mail and the Internet. Access to the Internet enables students to have access to electronic information that enables them to explore thousands of libraries, databases, educational resources, participate in distance learning and communicate with experts and other Internet users around the world. Access to the Internet through the district network is provided for educational and professional use to enable students to achieve greater academic and future success.

Wamego Unified School District is committed to making advanced technology and increased access to learning opportunities available to students, faculty, and other district employees. The district's goal in providing this access is to promote educational excellence in schools by facilitating resource sharing, innovations, and communications. To be in compliance with the Children's Online Privacy Protection Act (COPPA) and the Kansas Children's Internet Protection Act (KS-CIPA) as mandated by Congress and KS State Statute 75-2589, Wamego Unified School District has implemented the following guidelines and procedures for using the Internet.

This Acceptable Use Policy and Media Consent form is a legally binding document.

CIPA mandates school districts to certify that they have an Internet Safety Policy in place. These mandates and assurances must be in place so the district can receive E-rate funds or funds under Title III of Elementary and Secondary Education Act of 1965.

Wamego Unified School District incorporates Internet filtering technology, network transaction auditing and staff supervision to prohibit obscenity, child pornography and material harmful to minors in compliance with CIPA.

COPPA applies to the online collection of personal information from children under 13. School districts must be COPPA compliant to receive E-rate funds. Wamego Unified School District does not disclose personal information about students on district websites or through any unsecured Internet communication and staff members are instructed not to allow students to enter personal information on any external website or through any other Internet communication to comply with COPPA. A consent form must be signed prior to any personal student information or work being placed on any district provided website.

Limited Educational Purpose

With access to computers and people all over the world comes the potential for access to material that is illegal, defamatory, inaccurate or offensive to some people. The school district system has a limited educational purpose, which includes use of the system for classroom activities, professional or career development, and limited high-quality self-discovery activities. Users of the system are expected to use the Internet to further educational and personal goals consistent with the mission of the school district and school policies. Uses that might be acceptable on a user's private personal account on another system may not be acceptable on this limited purpose network.

Wamego Unified School District has taken steps to restrict access to inappropriate resources and information on the network and to monitor student use of the network. However, on a global network it is impossible to effectively control student access to all inappropriate material. The primary responsibility for access will rest with the student. We believe that the benefits to students through access to the Internet exceed the potential disadvantages. But ultimately, parents and guardians of minors are responsible for setting and conveying standards that children should follow when using media and information sources. To that end, Wamego Unified School District supports and respects each family's right to decide whether or not to allow Internet access for their children.

Use of District-owned Technology is a Privilege

The use of school district technology is a privilege, not a right. All users are responsible for good behavior on school computer networks and computing devices just as they would be if in a classroom. General school rules for behavior and communication apply. Authorized district personnel may review student/user files and communication to prevent misuse and to ensure students are using district technology responsibly and in compliance with applicable laws and district policies. There is no expectation of privacy when using technology resources owned and/or provided to users through Wamego Unified School District. Depending on the nature and degree of the violation and number of violations of the district policy, unauthorized or improper use of the school district technology or the Internet may result in one or more of the following consequences: suspension or cancellation of use of access privileges; payments for damages or repairs; discipline under other appropriate school district policies, including suspension and/or expulsion; and/or civil or criminal liability under applicable laws. In order to provide guidance, the following pages contain a non-comprehensive list of unacceptable uses and student rights. Please read these carefully. The district retains broad discretionary authority to maintain safety, order and discipline regarding unauthorized and improper use of these resources.

The following guidelines govern the use of the district network and computers:

District Technology

- Student shall not use district-owned technology for illegal or inappropriate uses at any time. The district network refers to the network provided on school grounds for educational use. The guidelines for district-owned computers cover use both at school and away from school.

- Students may have e-mail access through a district e-mail account. This resource is for academic uses only and may be monitored to ensure responsible use. Internet content filtering will be on all school devices, inside the building while on the school network and outside the buildings on any network. Ultimately, parents and guardians of minors are responsible for setting and communicating the standards that their children should follow when using media and information sources.

Students are not to remove any district installed software, Apps, profiles, restrictions or tamper in any manner with the device profiles. Students are not permitted to share any passcodes with other students. Modifying/tampering the system software on the laptop will result in disciplinary action being taken. The school does not accept responsibility for the loss of any apps or documents deleted due to the necessity of a reformat and/or re-image.
- Technology support for laptops will be available during the normal school day at WHS/WMS during the normal hours of operation. After hours support will not be available.

- Student shall not download software or install programs unless it is authorized by the district.
- Student shall do nothing to disrupt the use of the system for others, including changing programs or files, modifying settings, changing passwords, or reconfiguring the system.
- Student shall not physically modify, harm, or destroy any computer or network hardware in any manner.

- Student shall not intentionally waste district resources.

Plagiarism and Copyright Infringement

- Student shall not plagiarize works found on the Internet. Plagiarism is taking the ideas or writings of others and presenting them as if they were yours.
- Student shall respect the rights of copyright owners. Copyright infringement occurs when you inappropriately reproduce a work that is protected by copyright. Reproduction of a work includes using the work in another written form or posting the work or portion of the work on the Internet. If a work contains language that specifies appropriate use of that work, you should follow the expressed requirements. If you are unsure whether or not you can use a work, you should request permission from the copyright owner. Copyright law can be confusing; if you have questions, you should ask your teacher.

Inappropriate Access to Material

- Student shall not use the district technology to access harmful matter or material that is profane or obscene (pornography), that advocates illegal acts, or advocates violence or discrimination towards other people (hate literature). This may include certain song lyrics and related materials.
- If student mistakenly accesses inappropriate information, he/she should immediately tell the teacher or school administrator in charge. This will protect against any claim that the student intentionally violated this policy.
- Parent/guardian should instruct student regarding additional material that they think would be inappropriate to access. The district fully expects that students will follow parents' instructions in this matter.

Privacy Rights

- You should be aware that computer files and communications on the district's network, computers and the Internet are not private or secure.
- Use of mobile wireless Internet devices including but not limited to Hotspots and MiFi's at school is prohibited. Appropriate use of cellular phones is acceptable.
- Student will limit the use of the network and computer resources to classroom activities, teacher-directed activities, library-related research, or career development. Use of the system for any other purpose, personal or otherwise, is prohibited unless authorized by the district.
- The district may monitor student's use of the Internet and the district's computer resources. Monitoring of the system may lead to discovery of violations of the Student Acceptable Use Policy, the district's disciplinary codes or the law. The district reserves the right to suspend the use of personal electronic devices.
- Parents/guardians have the right to request to see the contents of their student's files.

Violations

- Violating this policy may result in one or all of the following: restricting technology access; loss of technology access; disciplinary or legal action including, but not limited to, suspension and/or expulsion; criminal prosecution under appropriate local, state and federal laws; and/or assessment of the cost of damages to hardware/software.
- The district will cooperate fully with local, state, or federal officials in any investigation related to any illegal activities conducted through the school district network.

- Major violations of the district's Student Acceptable Use Policy may result in the loss of use of all computing equipment and Internet access. The student may be able to regain computing privileges as appropriate. If this occurs, the student will be given the opportunity to remove his/her school-related files.
- If the violation also involves a violation of the district's disciplinary code, it will be handled in a manner described in the district's disciplinary code. Additional restrictions may be placed on the student's use of their network account.
- The district has broad discretionary authority to maintain safety, order and discipline and to ensure a positive learning environment for students and staff.
